

I SHIPPED SOMETHING

A task manager that writes its own executive reports.

Meet my new app : **KARA TASK LIST** — log your work, track its status, and turn the whole list into a boardroom-ready PowerPoint in one click.

SWIPE TO SEE HOW —→

Tracking tasks is easy. Reporting on them is the chore.

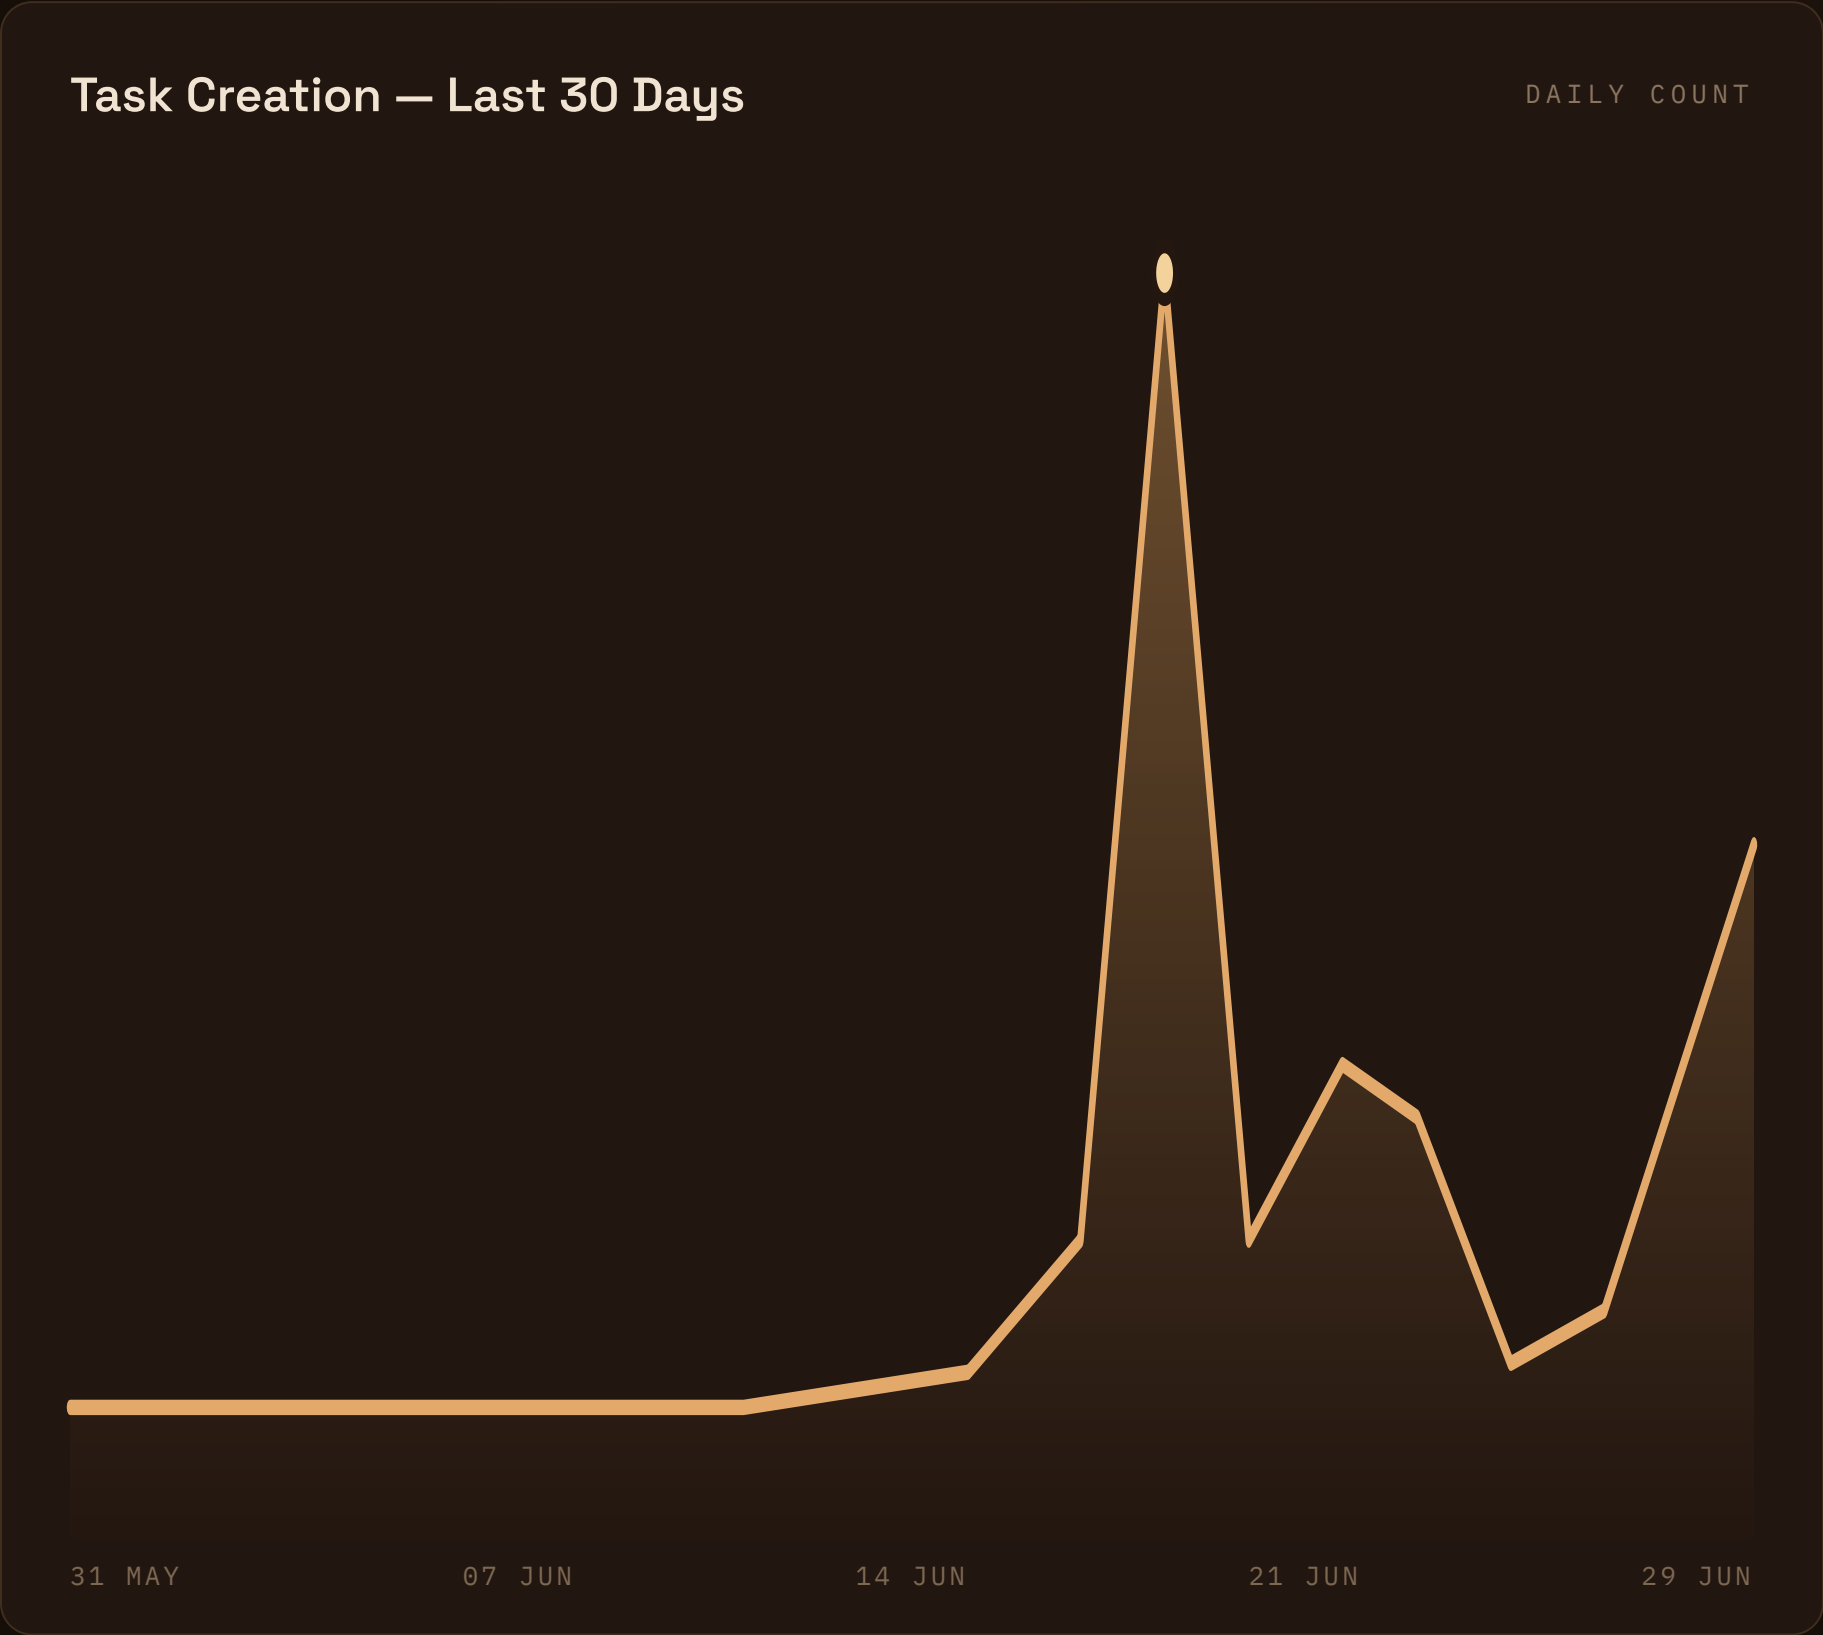

Every status update lives in a list. But come review time, you're rebuilding it all into slides by hand — copying, formatting, summarizing.

So I built the report into the tracker.

KARA keeps the log and generates the deck. Same source of truth, zero copy-paste.

A dashboard that gets to the point

Status mix and creation trend, surfaced the moment you log in.

Every task, filterable at a glance

Search by title...

TASK DETAIL

ITSM — Move email sent & set SLA on Task Created webhook

NOTES

Send SLA payload to backend on webhook fire...

 Notes help the executive AI summaries get richer context.

Executive Report

PERIOD
2026-06-21 — 2026-06-29

TASK PERFORMANCE REPORT

Operational Task Portfolio Review

*Analysis of key initiatives and
execution posture for the reporting
period.*

LET'S CONNECT

Thanks for swiping.

KARA started as a personal build to kill my own reporting busywork — log it once, let AI ship the deck. If you're building in this space, I'd love to swap notes.
